

# Galldorf

The group

*Together all year round*

## Agrogall

### I. Agrogall Kft.

Swine integration, crop production, farming

- When it comes to swine integration, the corporation's success lies in top quality fodder, world-class genetics and animal-centered care during the fattening period. Our excellent nutrition experts are fully aware of the needs of swine; therefore, they are provided with top quality fodder.

Our genetics ensure the excellent production results. Our swine production contractors' expertise, love for animals and commitment guarantees mutual profits as we make the best of our opportunities.

In 2016 we reached the 50 000 animals per year capacity in our swine integration.

- Crop production, farming, other services.
- Crops and livestock integration, arable crop production, post-harvest services.

Compound feed, full-fat soya and premix production, trade, collection, storage and transshipment of grains, feed oils, oilseeds, by-products and a variety of raw materials, export-import

#### GALLDORF TIMELINE

THE MOST IMPORTANT EVENTS - FROM THE BEGINNING TO THE PRESENT DAY

1997	1998-2003	2006	2007-2012	2013
Establishing	Technological development	Trading activities	Increasing of the storage	90 000 t of production, 150 000 t of trading

The company is a founding member of the Hungarian Soya Nonprofit Co. founded in 2012. Its primary purpose is to promote and manage the production of GMO-free soybeans in Hungary.

Integrations of:

- MALTING BARLEY

In order to ensure secure supplies for its partners, Galldorf Co. distributes prevalent Autumn- and Spring-sown malting barley varieties, especially the Spring-sown Bojos and other well-known types popular in the malting industry.

- SOYBEAN

In the field of soybean cultivation, we offer our associate's early and mid-season varieties, the Euralis varieties especially ES Mentor, Isidor, ES Advisor and ES Mediator to our Clients.

Due to their high nutritional parameters, such as crude protein or crude oil, we gladly contract for purchase at the moment of sowing.

Quality assurance:

Galldorf Zrt. is committed to the quality of the products and services!

 Danube Soya primary processor of full-fat soya, collector and trader with certified collection points within whole Hungary.

 ISO 22000 certified producer of compound feed, premixes and processor of full-fat soya, with certified storage and transshipment in Hernád.

 GMP+ FSA trade in feed materials, storage and transshipment of feed with certified transport and affreightment within the group.

 ISCC EU certified first gathering point with use of NUTS 2 default values for the CO<sub>2</sub>eq calculations.

Our company has launched its own program to increase GMO-free soybean acreage. In addition to soybean production, we cultivate the promotion of a variety of Autumn and Spring-sown barley among growers, the marketing of our seeds and their forestalling at harvest.

- 2014

The era of investments: during this period a number of large-scale investments were carried out resulting in the central aspiration, hepa filtration, technological and hygienically innovations.

Building up of the **Food Quality** soybean cleaning and sorting system.

- 2016

Strategical cooperation with Hungarian representative of EURALIS SA for growing, integration and marketing of the soybeans varieties as mainly ES Mentor, Isidor, ES Mediator, ES Advisor and others. For distribution and resale of the seeds of corn, sunflower seeds, rapeseeds and sorghum.

## Our product range

- Compound feed, full-fat soya, premixes – own production.
- Seeds, grains, oilseeds, malting barley, soybeans – own production from the integrations.
- Feed oils, protein carriers, brewery by-products, distillery by-products, mill by-products, feed supplements, organic acids, amino acids – originating from our long time partners.
- FULL-FAT SOYA produced by Galldorf Zrt. is processed with the well known German KAHL technology.
  1. In the 1st phase the crude soybean is being crunched.
  2. After the crunching, it is going to the hydro-thermic reactor for the heating process.
  3. After the hydro-thermic process, the material is going through the expander, which finally forms the finished product, the FULL-FAT SOYA.

## Why to choose our group in the different segments of agriculture?

- Galldorf Co. guarantees a permanent and stable quality.
- The production and distribution is controlled by strict quality assurance.
- We pay attention to be on schedule with the deliveries because we know that it is the main point of the fluent operation of your company.
- The not sufficient raw material quality may lead to the unpredictable growth of farm animals, which eventually leads to reduction in profits. That is the reason and the aim of our quality and technological development.
- To avoid the mistakes, we work with professionally qualified experts only – this is the way how we can prevent the sudden loss of stock caused by incompetence.
